We are not MADS, we are the NOMADS

About Us

We help organizations streamline their efforts by providing customer-specific technical solutions. Our proven methodologies have helped our clients increase both internal efficiencies and revenue.

We are believers, we are doers and we are achievers! Our team consists of creative people who are breaking stereotypical with their out of the box thinking. More than a team, **We are a family!**

Why Us?

We are chosen by many startups and enterprises, we have been there and done that! Our team of experts know their stuff and we care about you and your business. Do you need more reasons?

Our Approach

1 Discover

Innovation is coming from ideas or discoveries linked together by an unprecedented execution and we want to get to the root of that idea to execute it unprecedently. We want to know everything about your idea! How did it start? Where did it start? And most importantly how did you find your why?

3 Design

Our creative team follows the research driven approach. We gain an empathic understanding of the problem you are trying to solve. We immerse ourselves in your industry, learning through observation, interviews and analysis.

5 Deploy

We use the DevOps methodology which especially emphasizes the use of automation to streamline the software deployment process. We are comfortable working with all leading cloud platforms such as AWS, GCP , MS Azure etc.

2 Define

With a few brainstorming sessions, we understand what you want to achieve and we outline the plan of action on how we will achieve your goals!

4 Develop

Our experienced team of architects make sure your product is light, scalable and most importantly secure. We don't want you to feel left behind in this fast moving era, so we use the trending technologies with the best development practices.

6 Deliver

Once the testing cycle is complete. We deliver the product with the needed guidance and product manuals. A successful delivery is the beginning to a new relationship.

What We Do?

SAAS Development

We design and develop SAAS based product for startup companies.

Mobile Application Development

Android, iOS, Flutter

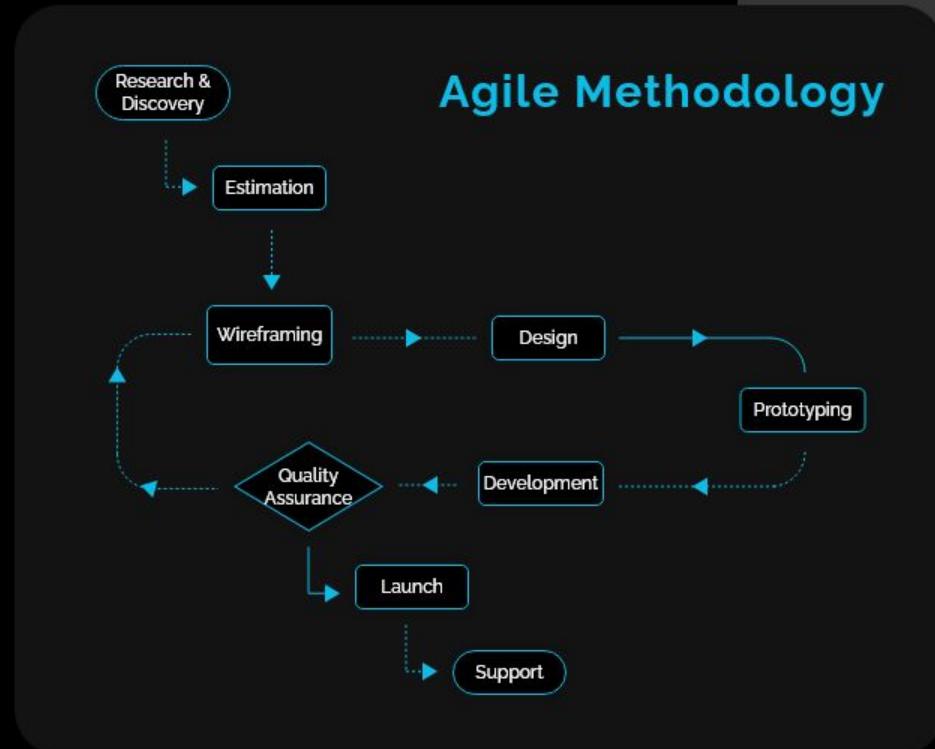

Web development

Static / Dynamic web design and development,
E-commerce, CRM, ERP

We Follow

TechNomads successfully delivers all its projects by using Agile Methodology. In accordance to which we plan/design and instantly start working on the project. This methodology also entertains your changing demands for the product allowing our team to re-plan and start working on the same without much delay. With the help of agile methodology, our team timely collects your feedback and delivers your expected product on time.

Big Daddy

A dark grey rounded rectangle containing a laptop icon. The laptop screen displays the Big Daddy website, featuring a yellow header with the logo and a main content area with a yellow background and a cartoon truck illustration.

As the local city transport is an unorganised sector in India.

Founders of this startup thought to solve this issue with their experience in the market and with the help of technology.

They want to make same city transport (also known as Last Mile Logistics) more reliable, organised, safe and available at finger tips of every transporter or individual – making relevant cost effective solutions accessible to everyone.

Client Requirement :-

- Website and mobile applications from where transporters or individuals can book their parcels
- Admin panel to handle the operations
- Driver app for real time tracking and better service

Technology

What We Do ?

The main challenge for most people, whether transporters or traders, after a parcel reaches a transport godown, is that the same city transport is a highly unorganised and unsystematic sector. Big Daddy_{TM} enters this domain with 5 major USPs.

Why To choose Big Daddy?

Our business platform offers fast delivery services at different locations across the country. We offer a wide range of delivery services to meet your needs.

Local delivery services

- Hassle free payments with Razorpay
- Track status of the orders

Platform Like Wise

Our client has faced many issues while transferring money from one country to another country. It is time taking and also charging high fees. This way client thought to develop a platform which will make payment transfer easy!

Client requirement :-

- Platform like transferwise which will give easiness in payment transfer
- Admin panel which is complicated and we have to build it scalable

Technology

Platform Like Wise

Send your money at lightning speed

You send

Recipient

Send your money the way you prefer

With EgoGram, you have the choice between your computer, your smartphone or our app for your money transfers.

Direct bank deposit
The money you send can be deposited to your recipient's bank account.

Credit card, Debit card, or bank account
The money you send can be collected in just a few minutes at thousands of collection points around the world.

Best exchange rate
Get the most value for your money with EgoGram's best rate guarantee.

Why choose

- Simplicity**
No need to go to an agency, send money in 90 currencies to 110 countries, from your mobile or computer.
- Security**
Our advanced technology protects your money and ensures it arrives safely with every shipment.

Send your money the way you prefer

Why choose

- Simple**
- Fast**
- Secure**
- Transparent**

Be there for your family. Even on the other side of the world.

Your money is safe with us

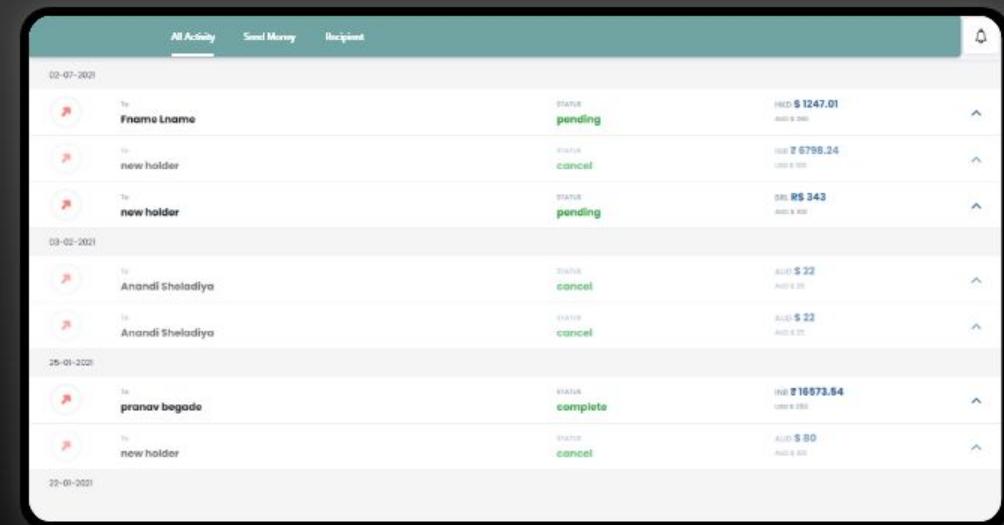

Verified by VISA, MasterCard, Diners, American Express

Send money with EgoGram

Optimize your transfers. Trust us.

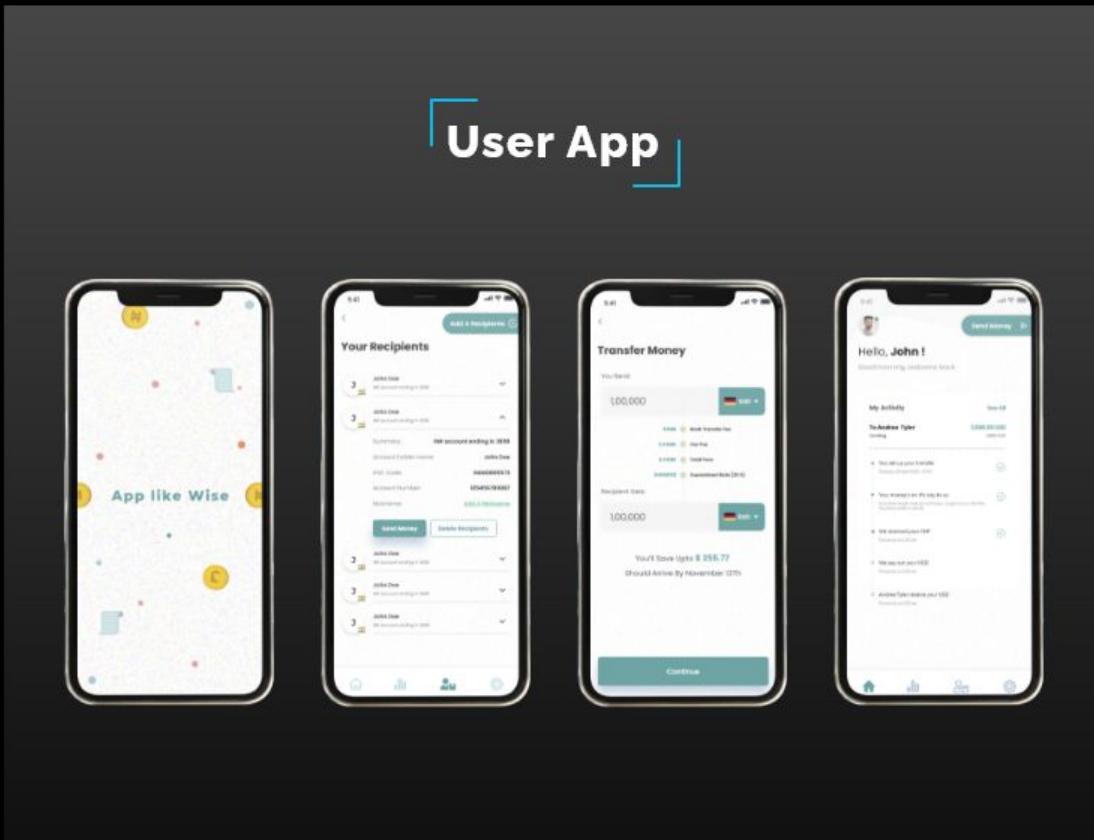

Track your transfers with our app.

Platform Like Wise

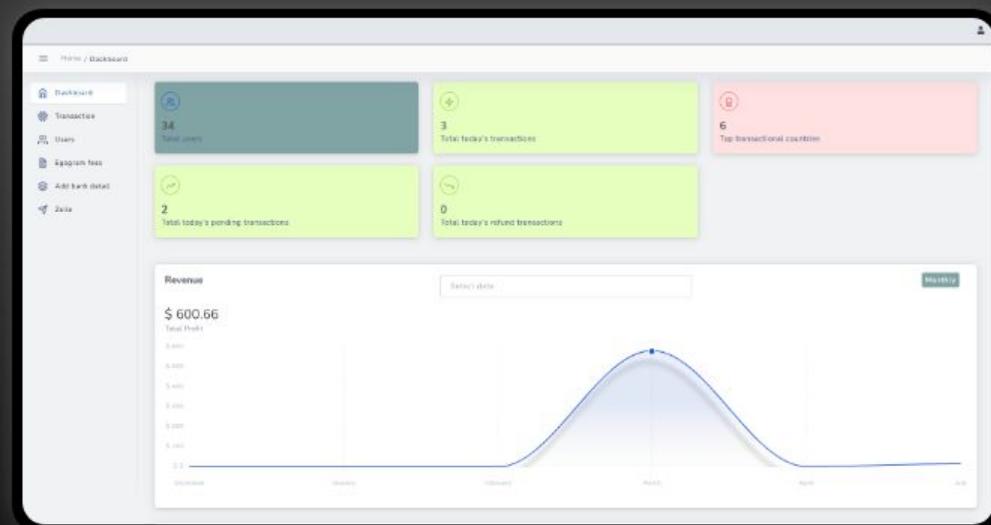

- Country and amount selection
- Add receiver or select receiver
- Upload verification proofs
- Reason to transfer money
- Select option to transfer - Manual bank transfer / Credit-debit transfer / Zelle transfer (USA only)
- Track transfer - Profile - Notification

Platform Like Wise

- Country and amount selection
- Add receiver or select receiver
- Upload verification proofs
- Reason to transfer money
- Select option to transfer - Manual bank transfer / Credit-debit transfer / Zelle transfer (USA only)
- Track transfer - Profile - Notification

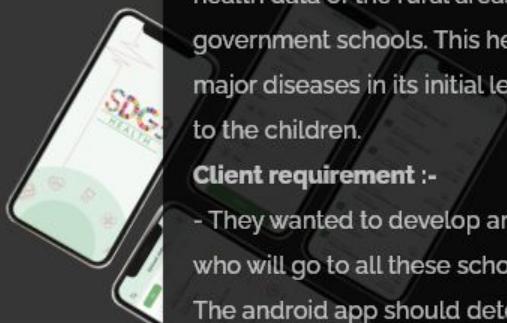

Platform Like Wise

- Add/edit/delete country
- Add/edit/delete bank accounts of this platform accross the world
- Add/edit/delete platform fees
- Add/edit/delete user
- List of transaction with current status
- List of Verification proofs to validate before transfer
- Revenue of platform

SDG3

Technology

Our client works with government entities for managing health data of the rural areas, especially the children from government schools. This helps government to detect any major diseases in its initial level and provide proper nutrition to the children.

Client requirement :-

- They wanted to develop an app for a least trained person who will go to all these schools and collect the health data.
- The android app should detect various body parts and such as eyes, tongue, teeth, skin and nails and click the highest quality image and upload the same in their Electronic health record system.

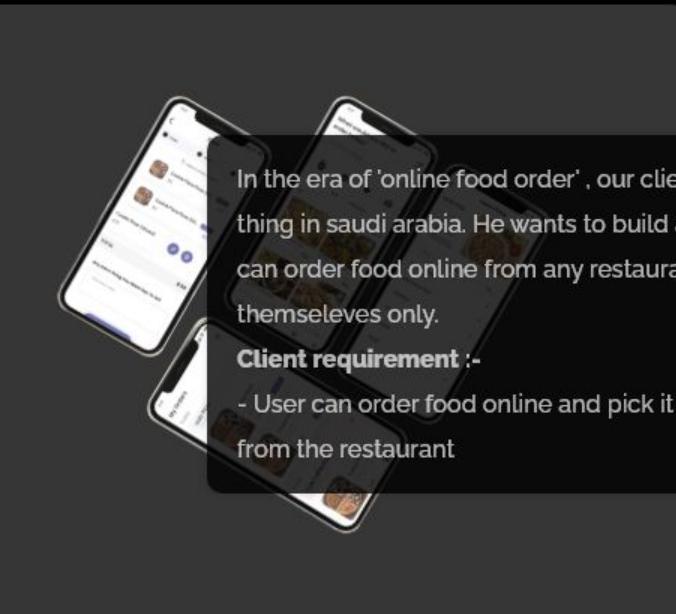

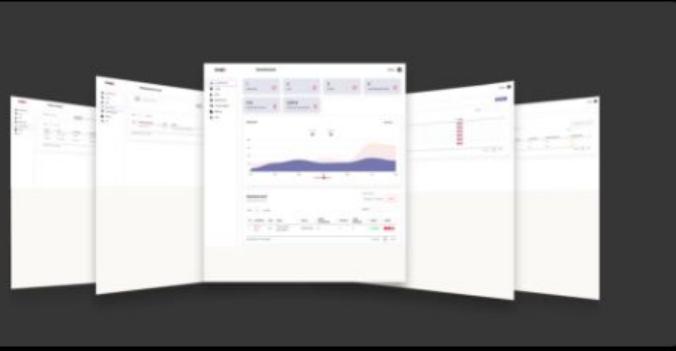

SDG3

User App

- Login with the credentials
- Get list of the schools which needs to be visited
- Get student health ID and list of the students from a particular school
- Per student we managed to click images for body parts such as eyes, tongue, nails, teeth, skin
 - with an overlay image and a guided image for the same, user can know what to do and how to click a picture.
- Once the image is clicked it will be checked for its quality and will be stored to the local database along with that it will be pushed to the EHR.

Online Food Order

Technology

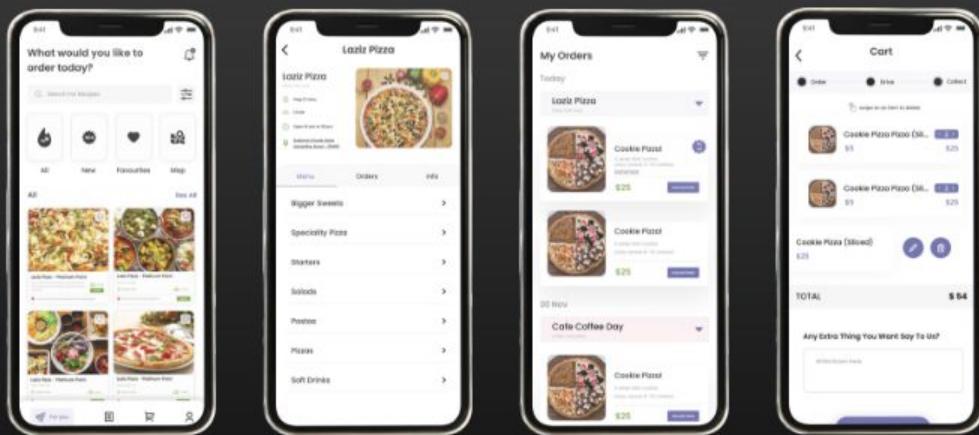

In the era of 'online food order' , our client wants the same thing in saudi arabia. He wants to build a platform where user can order food online from any restaurant and then pickup by themselves only.

Client requirement :-

- User can order food online and pick it up by themselves from the restaurant

Online Food Order

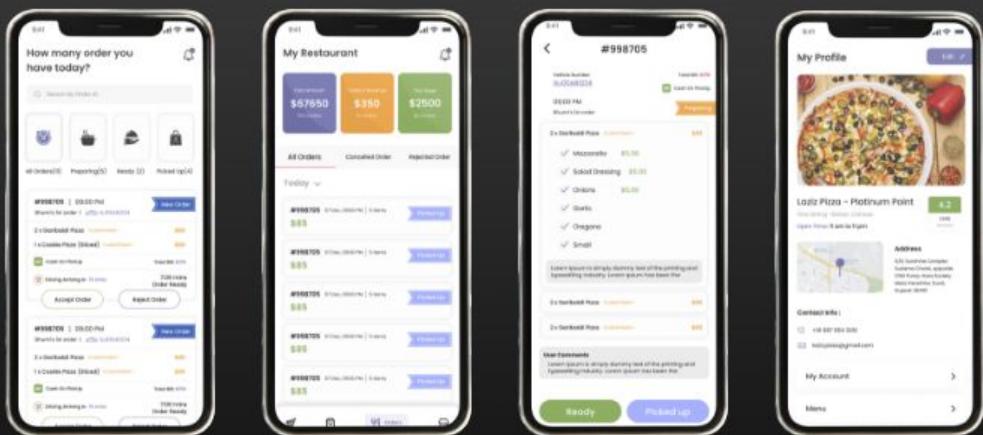

User App

- List of nearby restaurants
- Add food to cart
- Add/edit/delete vehicle detail
- Order food
- Online payment
- Pickup food [showing traffic time + food preparing time so user can reach on time]

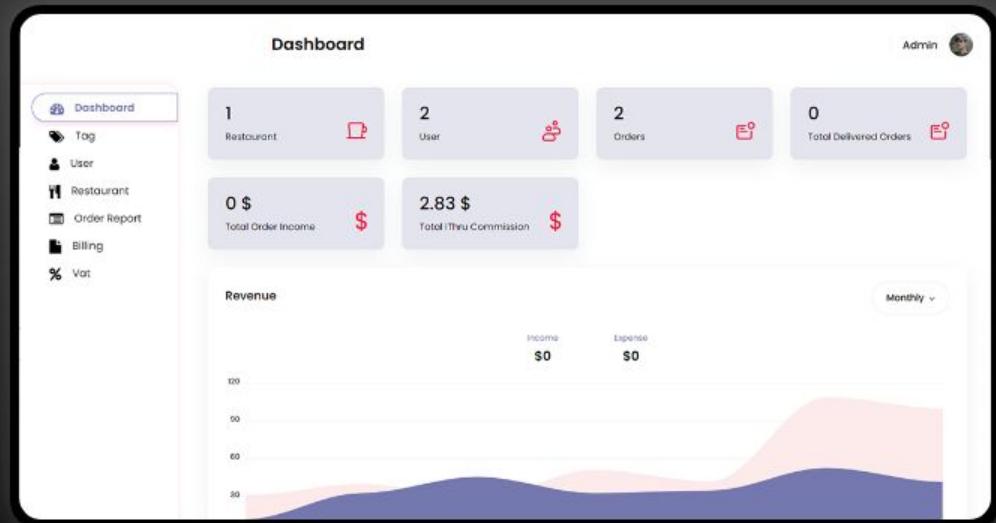

Online Food Order

Restaurant App

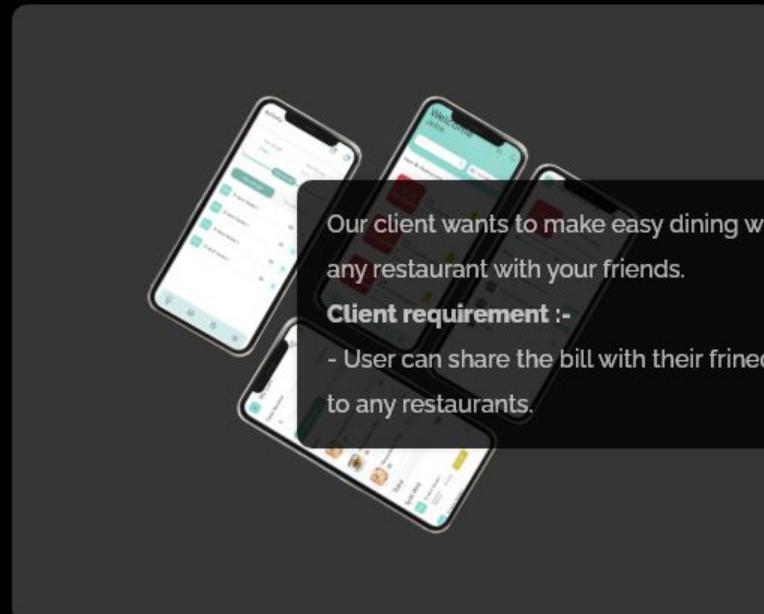

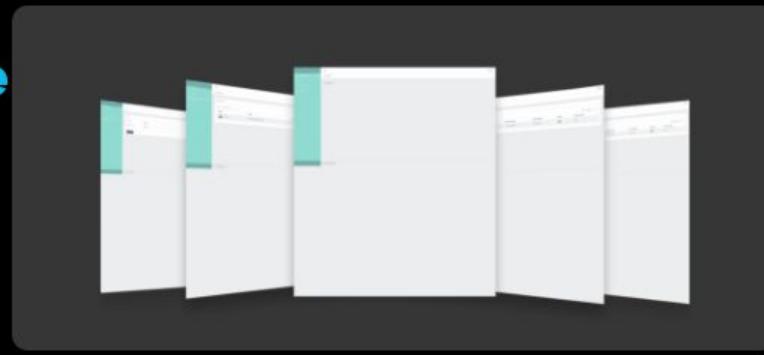

- Add restaurant detail
- Add menu with dynamic categories
- Buy package
- New/pending/prepared/delivered order list
- Today/weekly/monthly/annual income
- Profile
- In app Notification

Online Food Order

- Add/edit/delete restaurants
- List of users with ordered food list
- Add/edit VAT
- Add/edit/delete subscription packages for restaurants
- Revenue and all data statistics

Restaurant Bill Share

Our client wants to make easy dining when you are going in any restaurant with your friends.

Client requirement :-

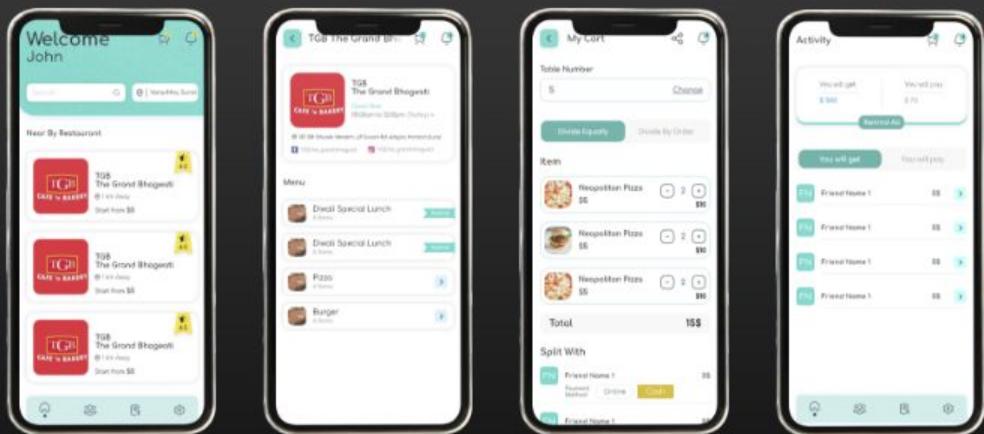

- User can share the bill with their friends when they are going to any restaurants.

Technology

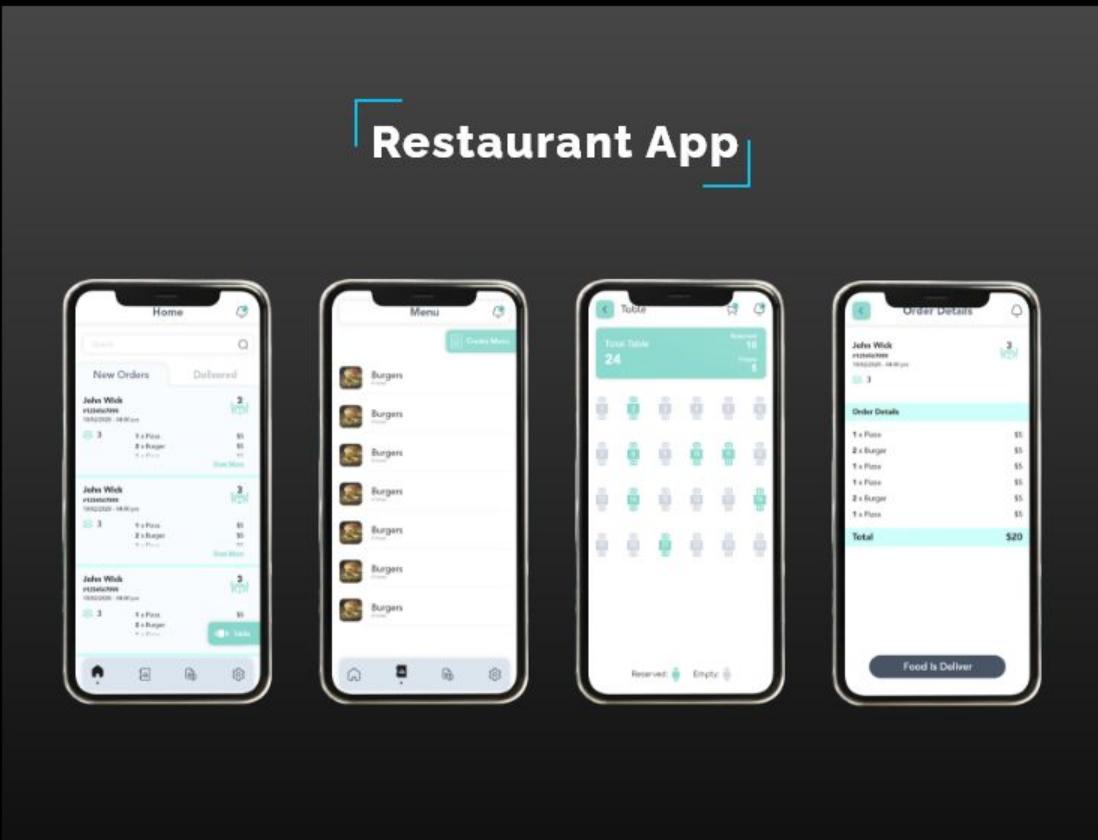

Restaurant Bill Share

User App

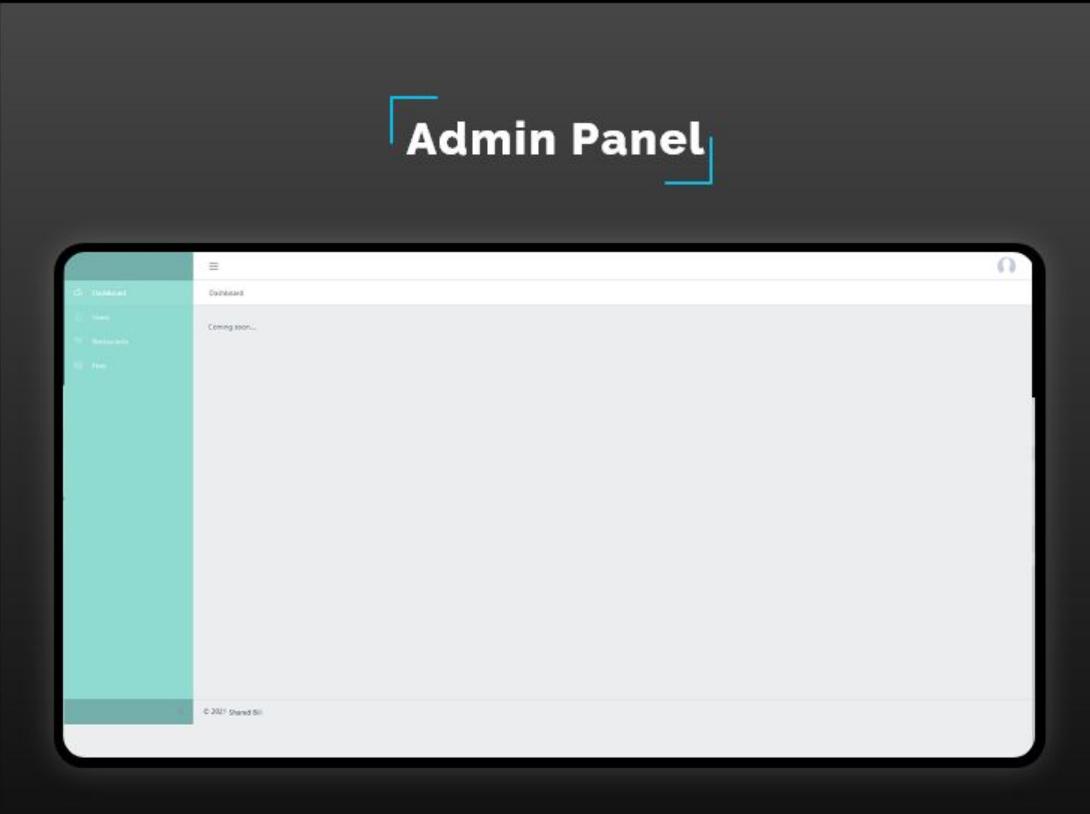

- Create group with nearby users
- List of nearby restaurants
- Add food into cart
- Select table number
- Divide order equally or Divide by order while payment
- Share order detail with group members [if user don't have app then they can download from sent SMS by other users]
- Settle money
- Profile - In-app Notification

Restaurant Bill Share

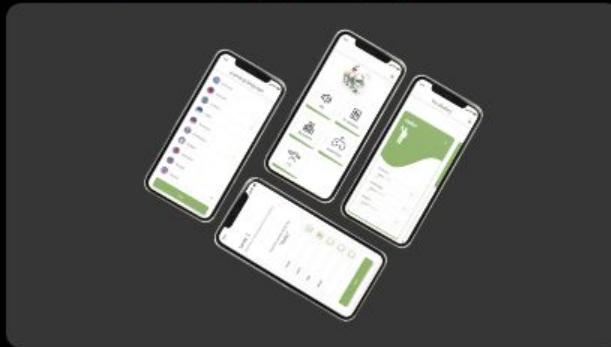

- Add restaurant detail
- Add multiple menu
- Add or create payment account
- New/delivered order list
- Today/weekly/monthly/annual income
- Profile - In app Notification

Restaurant Bill Share

- » List of restaurants
- » List of users
- » Edit restaurants and user fees

Online Language Learning App

A dark grey rounded rectangle containing three white smartphones arranged diagonally. A light grey callout box originates from the bottom right smartphone and points towards the center of the slide. Inside the callout box, there is text about the project's purpose and client requirements.

To Learn Foreign Langugae is the necessary when you are travelling and technology can make it more easy. One of our client thought the same thing and started this product development with us.

Client requirement :-

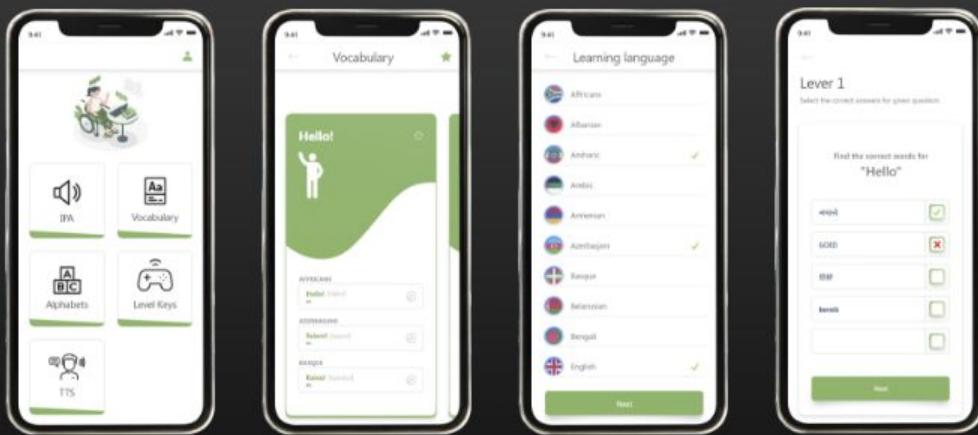

- Anyone can learn different languages and test their language skills in the app only.

Technology

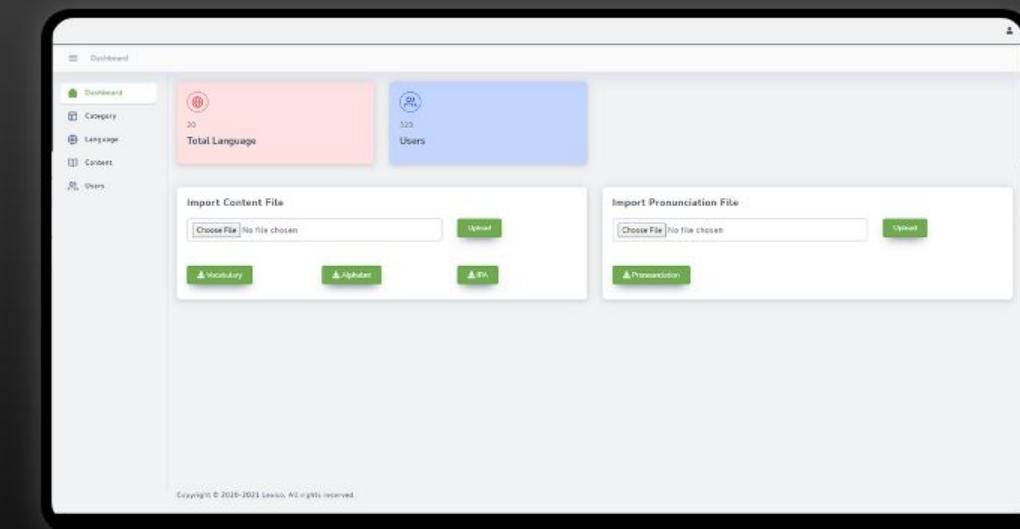

Online Language Learning App

User App

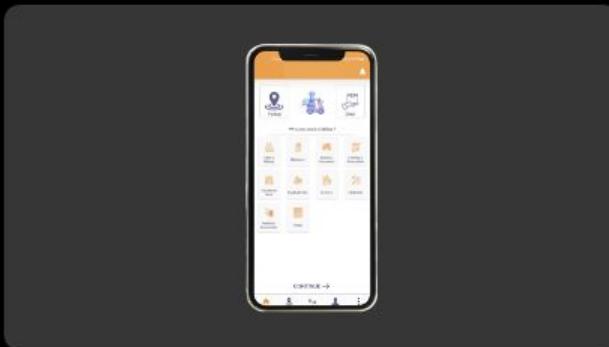

- Select Native and Learning language
- View Alphabets/Vocabulary/IPA
- Favourite
- Games [where user can select right answer for Vocabulary in different languages]
- Profile
- Change learning/native language
- Text-To-Speech [Amazon polly and Google TTS]

Online Language Learning App

- Dashboard - All data statistics
- Add/edit/delete categories/sub-categories
- Add/edit/in-active languages
- List of Users and detail
- Add/edit/delete/view vocabulary/ IPA/Alphabets

Online Courier Service

Two smartphones are shown from a top-down perspective, similar to the first image. A callout box with a dark gray background and white text is overlaid on the right side of the phones. The text describes the client's thought process and the resulting app development.

Our Client has thought that there are lots of small things which we can deliver in local area like stationary, food, Books, Clothes etc. To make it happen, we developed an app from where user can place an order for delivery.

Client requirement -

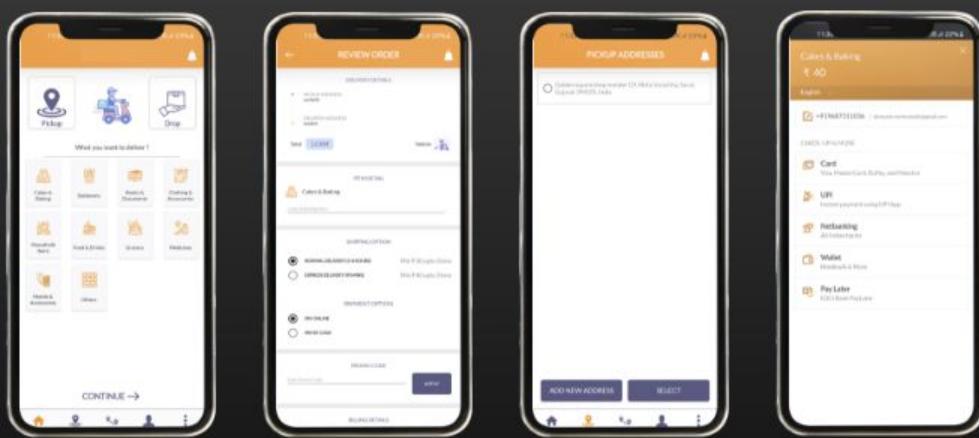

- User can place an order to pickup an item from one place to deliver it at another place.

Technology

Online Courier Service

User App

- Select category
- Add/edit/delete/select pickup - drop location
- Google map for live location
- Order preview
- Order place and online payment
- History
- Profile
- In-app Notification

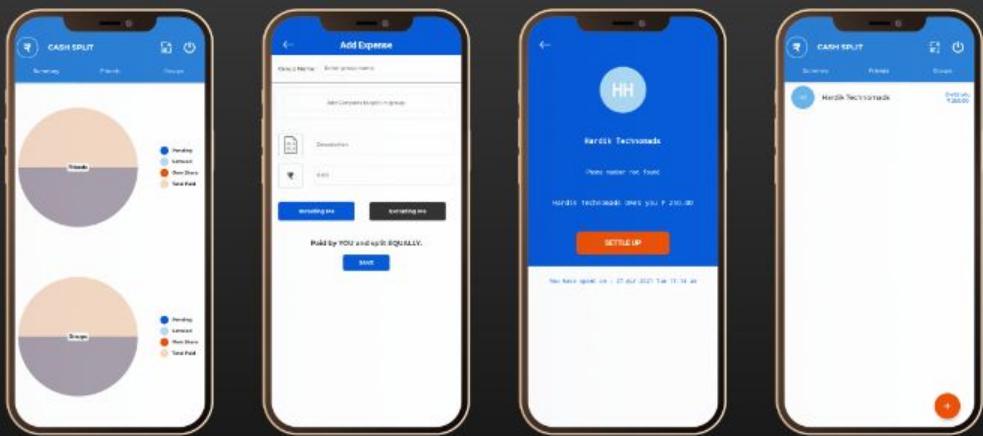

Cash Split

Technology

Cash Split

User App

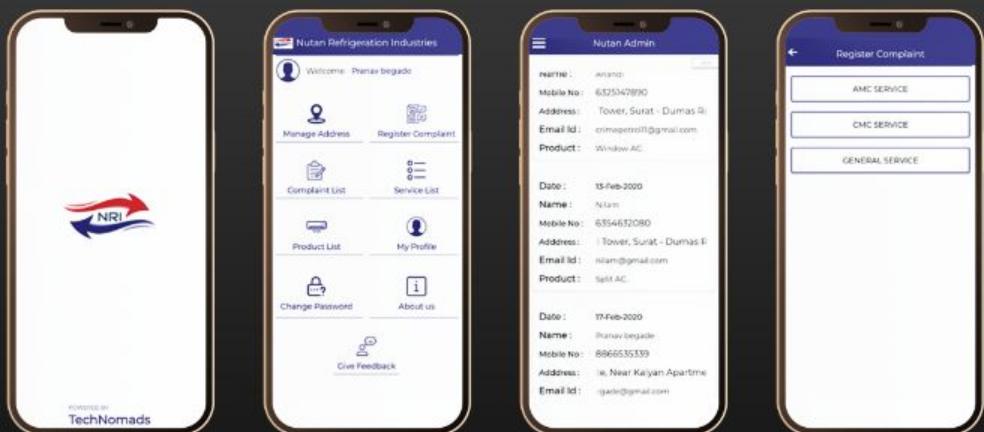

- Finance management
- Multilingual [Hindi, English]
- Create group by exporting contact list
- Easy split up reminders
- Profile

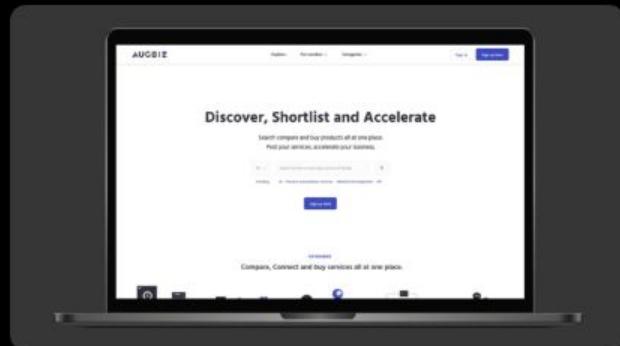

We helped an agency to build their own iOS and Android application which their customer use to register complaints or submit AMC requests.

User App

- Geo-location
- AC service request
- Predefine and custom request
- New product inquiry
- Service close with verification
- History
- Profile

AugBiz

A screenshot of the AugBiz website homepage displayed on a desktop monitor. A large callout box on the right side contains text about the founder's requirements: "The founder of the company wanted to build a platform where they can connect enterprise clients to the quality vendors." Below this, under "Client requirement :-", there are two bullet points: "- Website and admin panel for managing all the requirements" and "- Admin panel to handle the operations".

The founder of the company wanted to build a platform where they can connect enterprise clients to the quality vendors.

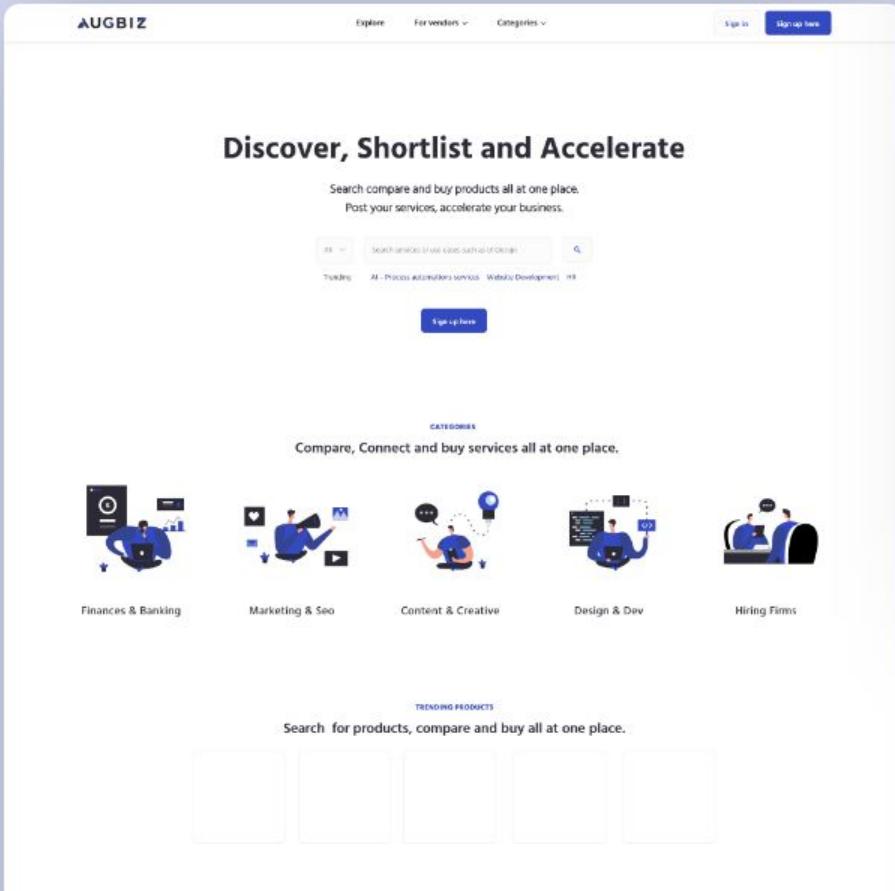

Client requirement :-

- Website and admin panel for managing all the requirements
- Admin panel to handle the operations

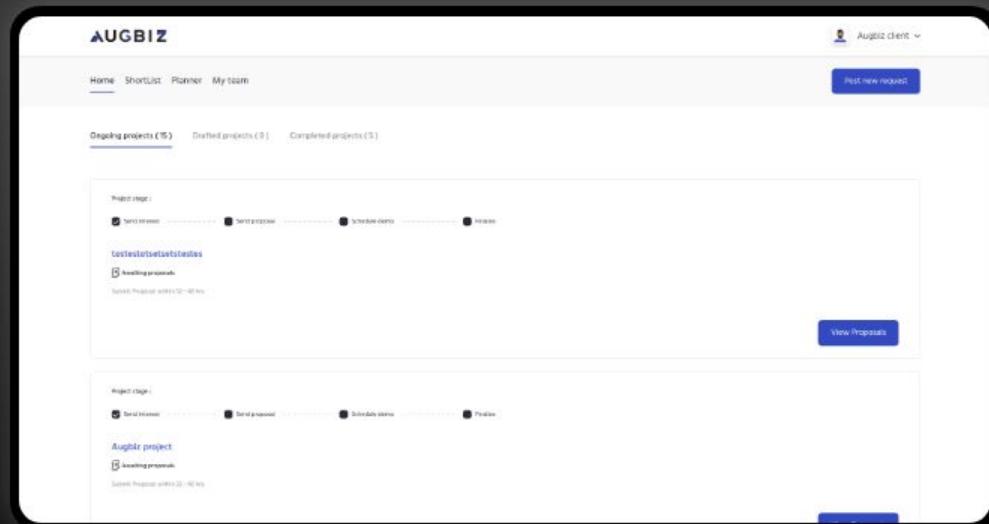

Technology

Augbiz

Client Portal

- Post requirements
- Shortlist vendors
- Schedule demo with vendors
- Search products and compare with multiple agencies
- Invite and manage team members

Vendor portal

The screenshot shows the Augbiz Vendor portal dashboard. At the top, there are four summary cards: 'Assign Projects' (10), 'Proposal Submitted' (7), 'A Waiting Response' (3), and 'Booked Revenue' (25000 ₹). Below these are two tables: 'Current tasks' and 'Weekly progress'. The 'Current tasks' table lists three entries with dates from July 02 to July 05, all assigned to 'Augbiz client'. The 'Weekly progress' table lists three entries with dates from July 07 to July 11, also assigned to 'Augbiz client'. At the bottom, a section titled 'Potential clients are looking for Your services' displays three client entries: 'Augbiz client' (Project Name: 30000000XX, Service Title: The standard Lorem ipsum passage, used since the 1500s, Minimum Budget: 20000, Project Deadline: 1~2 months), 'Augbiz client' (Project Name: gbchth, Service Title: sdgh, Minimum Budget: 20000, Project Deadline: 3~6 months), and 'Augbiz client' (Project Name: 30000000XX, Service Title: The standard Lorem ipsum passage, used since the 1500s, Minimum Budget: 20000, Project Deadline: 1~2 months).

- Dashboard with datas like assigned projects, submitted proposals, booked revenue, upcoming meetings
- Manage profile
- Add products
- Submit proposals
- Manage calendar meetings
- Invite team members

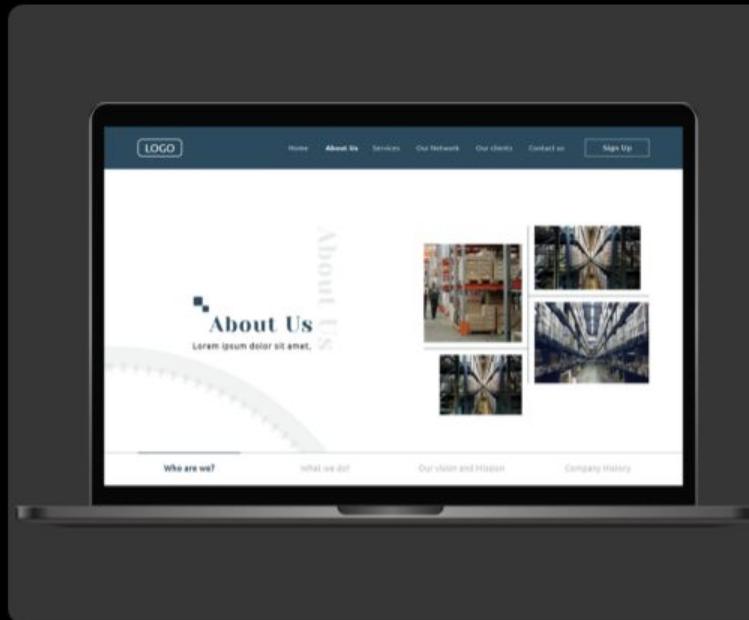

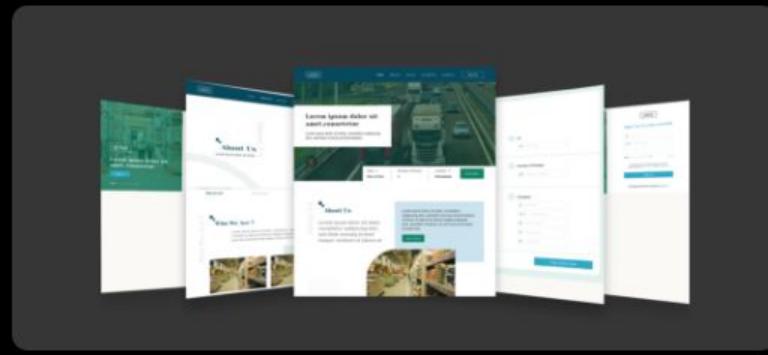

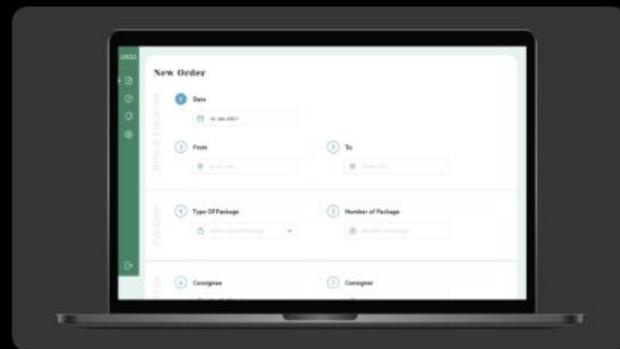

Augbiz

The screenshot shows the Augbiz Admin Panel interface. At the top, there's a header with the Augbiz logo and a user profile for 'KARTIK M.' Below the header is a navigation bar with links for Dashboard, Use Cases, Vendor, Client, Project, and Settings. The main content area features several cards with statistics: 'NO OF CLIENT / USERS' (10/2), 'NO OF VENDORS / USERS' (31/19), 'ACTIVE PROJECTS' (20), 'ACTIVE PRODUCTS' (14), 'PROPOSAL SUBMITTED FOR PROJECTS' (23), 'PROPOSAL SUBMITTED FOR PRODUCTS' (0), 'PENDING VENDOR REQUESTS' (7), and 'PENDING PROJECT REQUESTS' (5). Below these cards is a section titled 'Upcoming Meeting' which lists scheduled meetings with columns for Meeting Date, Time, Client, Vendor, and Project. The table contains the following data:

Meeting Date	Time	Client	Vendor	Project
2021-07-02	10:00:00	Augbiz client	Vendor16	0999999999999999
2021-07-05	12:00:00	Augbiz client	Vendor16	gchitn
2021-07-05	13:00:00	Augbiz client	Vendor16	0999999999999999
2021-07-06	15:00:00	Augbiz client	Vendor16	Kys for Suman task
2021-07-06	17:00:00	Augbiz client	Vendor16	Kys for Suman task
2021-07-15	12:00:00	Augbiz client	Vendor16	testcaseforstatusissues

- Add services/products of different domains
- Add use cases for multiple domains
- Approve vendors after quality checks
- Manage client requirements
- Assign client requirements to suitable agencies based on the bandwidth
- Help clients/vendors with the onboarding
